## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1 drawn to a process for preparing a cross-linked polymer compound in a three dimensional network wherein at least one activated polysaccharide or oligosaccharide derivative is dissolved in a polar organic solvent ....., classified in class 536, subclasses 55.1, 123.1, 123.12.
  - II. Claims 2-5, 13 drawn to a support material consisting essentially of a cross-linked polymer compound, classified in class 536, subclasses 55.1, 123.1, 123.12.
  - III. Claims 6-11 drawn to a process of preparing a support material ....., classified in class 536, subclasses 55.1, 123.1, 123.12.
  - IV. Claim 12 drawn to a process for preparing and separating enantiomers ....., classified in class 536, subclasses 55.1, 123.1, 123.12.
  - V. Claim 14 drawn to a process of organic synthesis in a heterogeneous phase comprising a support material ....., classified in class 536, subclasses 55.1, 123.1, 123.12.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make another and materially different product. For example,

Art Unit: 1623

the process as claimed can be used to make cross-linked peptide, protein or oligonucleotide derivatives as opposed to cross-linked polysaccharide or oligosaccharide derivatives.

Inventions I-V except II and III are all unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and burden to search, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined

Art Unit: 1623

claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
